

Tyler Stahl

Nonprofit Technology Engineer

Glen Rock, NJ · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

SUMMARY

Software engineer experienced in mission-driven platforms, stakeholder collaboration, and practical improvements to nonprofit technology systems.

EXPERIENCE

Front-End Developer — NAMI

2024-12 – 2026-01 · Remote

Built and maintained NAMI's Laravel-based core business application with a focus on reusable UI components, accessibility, and Cypress E2E testing.

- Helped scale nonprofit engineering delivery by centralizing reusable Tailwind UI components and Storybook-based iteration for the core business application.
- Designed UX prototypes for NAMI's internal event planning workflows to clarify staff user journeys.
- Strengthened reliability of a nonprofit event-management platform by adding Cypress coverage for critical user workflows.
- Improved accessibility compliance on a mission-driven platform through audits and follow-through initiatives.
- Helped improve reliability of nonprofit training registration workflows used by staff and program participants.

Technologies: Laravel, Livewire, Alpine, Cypress, JavaScript, Tailwind CSS, Storybook, Figma, Adobe XD

Software Engineer — Charity Navigator

2023-08 – 2024-09 · NJ

Contributed to a high-traffic React/TypeScript data portal, GraphQL API transitions, and cross-functional delivery with product and data teams.

- Supported a mission-driven data portal used by 50,000+ clients during peak traffic events.
- Queried MySQL via Sequelize and surfaced results in Charity Navigator front-end features.
- Supported Charity Navigator CI/CD deploy scripts that used Docker for application delivery.

- Worked cross-functionally to improve nonprofit data-review operations.

Technologies: React, TypeScript, GraphQL, JavaScript, Sequelize, MySQL, Docker

Front-End Web Developer — Charity Navigator

2019-03 – 2023-08 · NJ

Led frontend design and development for platform rebranding, technology migration, and high-traffic public web experiences.

- Helped modernize a mission-driven public platform used by millions of annual visitors.
- Worked directly with nonprofit marketing leadership to align technical delivery with campaign and rebrand timelines.
- Contributed to technology work that supported a major nonprofit grant outcome and improved processing efficiency.

Technologies: JavaScript, HTML5, CSS, React

SELECTED PROJECTS

NAMI Design Component Library — NAMI

2024-2026

Front-end delivery needed stronger architecture standards and reusable UI patterns across the core business application.

Built a Tailwind-based centralized design component library—including a custom org-wide shared library and a Storybook version for rapid iteration and testing—to enforce standards and streamline UI deployment.

Technologies: Laravel, Livewire, JavaScript, Tailwind CSS, Storybook

NAMI Internal Event Planning UX — NAMI

2024-2026

Internal event planning workflows needed clearer user journeys before front-end implementation.

Prototyped new user journeys in Figma and Adobe XD for NAMI's internal event planning tool.

Technologies: Figma, Adobe XD

NAMI 720 Event Platform — NAMI

2024-2026

Maintain and improve event-management workflows for nonprofit users and staff.

Contributed front-end implementation and Cypress testing practices in a Laravel/Livewire application.

Technologies: Laravel, Livewire, Alpine, Cypress

CCIE-TM Training Registration — NAMI

2024-2026

Support reliable registration behavior for multi-date nonprofit training workflows.

Improved registration handling, documented testing steps, and supported staging validation.

Technologies: Laravel, Livewire, Alpine, Cypress

Charity Navigator Data Review Portal — Charity Navigator

2023-2024

Internal and client data-review workflows needed a scalable React/TypeScript portal with modern API integration.

Engineered portal features, queried MySQL via Sequelize for front-end data, helped transition legacy flows into GraphQL, and worked with Docker-based CI/CD deploy scripts.

Technologies: React, TypeScript, GraphQL, Sequelize, MySQL, Docker

Charity Navigator Platform Rebuild — Charity Navigator

2019-2023

Modernize and rebrand a high-traffic nonprofit platform serving millions of annual users.

Led frontend execution of the 20th-anniversary rebrand and platform rebuild in collaboration with external design agencies and internal stakeholders.

Technologies: JavaScript, HTML5, CSS, React

SKILLS

Front-End: Tailwind CSS, Livewire, Figma, Adobe XD, Storybook, UX Design / Prototyping, Performance optimization

Back-End: Sequelize, Laravel

Testing: Cypress

DevOps: Docker, CI/CD

Collaboration: Release support, Stakeholder collaboration, Deep listening, Agile

EDUCATION

Udacity — Front-End Web Developer Nanodegree

Full scholarship from Google through the "Grow with Google" program.

Seattle University — MA, Counseling

Dartmouth College — BA, Anthropology
