

Tyler Stahl

Front-End Engineer

United States · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

SUMMARY

Front-end engineer focused on UI implementation, component architecture, JavaScript frameworks, accessibility, and regression testing. Experienced shipping features in Laravel/Livewire stacks with Cypress coverage.

EXPERIENCE

Front-End Software Engineer — NAMI

2024 – Present · Remote

Front-end engineering on nonprofit event and training management platforms, with emphasis on Laravel/Livewire UI implementation, Cypress testing, and release reliability.

- Built Cypress coverage for key user flows in a Laravel/Livewire application, helping stabilize releases and improve UI regression testing.
- Implemented and stabilized multi-date registration UI behavior in a Livewire application as part of a training registration release.
- Implements and refines user-facing features in Laravel/Livewire applications, focusing on reliable UI delivery.

Technologies: Laravel, Livewire, Alpine.js, JavaScript, Cypress, HTML, CSS
