

Tyler Stahl

Nonprofit Technology Engineer

United States · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

SUMMARY

Software engineer in nonprofit technology, building reliable donor- and user-facing platforms. Combines front-end implementation with stakeholder collaboration and mission-aligned engineering practices.

EXPERIENCE

Front-End Software Engineer — NAMI

2024 – Present · Remote

Front-end engineering on nonprofit event and training management platforms, with emphasis on Laravel/Livewire UI implementation, Cypress testing, and release reliability.

- Strengthened reliability of a nonprofit event-management platform by adding Cypress coverage for critical user workflows.
- Supported a nonprofit training registration release with bug fixes, test coverage, and staging deployment assistance.
- Supports mission-driven event and training platforms with practical front-end engineering and platform maintenance.

Technologies: Laravel, Livewire, Alpine.js, JavaScript, Cypress, HTML, CSS
