Professional Summary

I seek to be the bridge, translator between Advanced AI and Human Needs. A strategic Full-Stack Software Engineer and AI Architect with an interdisciplinary foundation in Anthropology (BA) and Counseling (MA). I specialize in bridging the ROI gap by architecting not just code, but the human-centered trust frameworks and Human-in-the-Loop (HITL) workflows required for enterprise adoption. Proven track record of scaling platforms for 11M+ users while acting as the primary translator between executive vision and technical execution.

Core Competencies

- **Connective Strategy:** Behavioral Coaching, Technical Change Management, Stakeholder Translation, Customer Focus.
- **Applied AI & Scale:** Multi-Agent Orchestration (OpenClaw), Hybrid Inference Strategy, Durable Memory (SQLite), Python ETL Pipelines.
- **Engineering Excellence:** React, TypeScript, GraphQL, REST APIs, PostgreSQL, CI/CD, Automated Testing (Cypress/Playwright).

Professional Experience

Independent R&D | NJ

Applied AI Developer | Feb 2026 – Present

- **Human-Agent Trust Framework:** Engineered a multi-agent orchestration ecosystem via OpenClaw, prioritizing HITL terminal approvals and secure gateways to ensure organizational trust in autonomous systems.
- **Operational Efficiency:** Designed a tri-tier hybrid inference strategy routing complex reasoning to Gemini 3.1 Pro and utility tasks to local Gemma models, reducing token costs by 40%.
- **Durable State Management:** Built autonomous Python ETL pipelines with SQLite persistence to solve for long-running data persistence in multi-turn agent workflows.
- **Tools used:** Cursor Agents SDK, Gemini/Gemma models, Google AI Studio, Firebase, Codex, IBM Bob, Openclaw, Ollama

National Alliance on Mental Illness (NAMI)

Front-End Developer | Dec 2024 – Jan 2026

- **Systemic Standardization:** Introduced a centralized Design Component Library to enforce brand standards and streamline development velocity.
- **Accessibility & Trust:** Led accessibility audits that increased the aggregate compliance score by 30%, ensuring usability for NAMI's diverse and sensitive user base.

Charity Navigator | NJ

Software Engineer | Mar 2019 – Sep 2024

- **Executive Partnership:** Partnered directly with the CMO to execute a 20th-anniversary rebrand that secured a \$5M grant—double the organization's annual revenue.
- **High-Traffic Performance:** Optimized React/TypeScript architecture to sustain traffic spikes of 700,000 concurrent visitors during high-stakes giving events.
- **Business Impact:** Delivered full-stack initiatives that increased internal processing efficiency by 43%.

Education

- **Master of Arts (MA), Counseling,** Seattle University
- **Bachelor of Arts (BA), Anthropology,** Dartmouth College
- **Front-End Nanodegree,** Udacity (Google Scholarship Recipient)

Certifications

- **Google AI Summit,** Google Skills, Jun 2026 (pending)
- **5-Day AI Agents: Intensive Vibe Coding Course with Google,** Kaggle, Jun 2026 (pending)
- **Agentic AI,** DeepLearning.AI, May 2026
- **Artificial Intelligence (AI) Skills in Action,** Breach Secure Now, Oct 2025
- **Artificial Intelligence (AI) Fundamentals,** Breach Secure Now, Oct 2025
- **2025 Cybersecurity Training,** Breach Secure Now, Jan 2025
- **Enterprise Design Thinking Practitioner,** IBM, Jun 2021
