JOB REQUIREMENTS

- **Hands-on expertise with Google's Gemini models:**

Expertly routes tasks across Gemini model tiers (Pro/Flash/Gemma) using a hybrid local/cloud strategy and ships production-ready, Gemini-backed features within agent pipelines (Source: Cognitive Bridge; OpenClaw).

- **World-class communication skills to articulate project status and delivery challenges to leadership and client audiences:**

Produces structured status narratives—including trade-offs and blockers—effectively translating complex technical constraints for non-technical stakeholders. I.e. chief marketing officer, programs teammates (Source: internal customer work at Charity Navigator, NAMI).

- **Actively participate in technical discovery workshops to translate client business requirements into GCP technology design elements:**

Facilitates stakeholder requirements sessions to transform business needs into stable technical specifications, architecture sketches, and demo-ready solution plans (Source: internal customer work at Charity Navigator, NAMI; client interactions at Volant Web Design).

- **Act as an agile SME/coach on modern software development:**

Partnered across teams on sprint-shaped delivery, component-library adoption, and quality gates; coaches agent workflow development toward explicit definition-of-done using AgentOS manifests (Source: NAMI component library; Charity Navigator).

- **Design, build, test and deploy innovative, agentic-first solutions on GCP that are directly tied to client business requirements:**

Delivers robust agentic systems featuring durable state, human approval gates, and outcome-linked scope, moving prototypes from concept to production-grade deployments (Source: OpenClaw; AgentOS; Cognitive Bridge).

- **Minimum 2 years proven experience with Application Modernization and/or Agentic AI solutions:**

Built complex agentic workflows with Gemini routing and HITL approvals; modernized large-scale public web platforms and API layers serving 11M+ annual users (Source: OpenClaw; AgentOS; Charity Navigator rebrand and tech stack migration).

SUMMARY

Product-minded Google Cloud Platform (GCP) specialist and Applied AI Developer with 7+ years of experience engineering scalable, data-intensive web applications. Combines deep expertise in building multi-agent workflows on Vertex AI with a client-centric approach honed in technology consulting and B2B roles. Adept at translating complex business requirements into innovative, value-driven software products and guiding teams in modern, agile ways of working.

EXPERIENCE

Applied AI Developer & Researcher | Independent R&D

February 2026 – present

Designed and built a multi-agent workflow pilot on GCP to synthesize fragmented market data into actionable insights, resulting in quicker leadership decisions and a 15% increase in profitability. Engineered and presented a compelling proof-of-concept (POC) solution leveraging a hybrid inference architecture with Google Gemini and Vertex AI to optimize for latency, cost, and performance. Developed autonomous Python ETL pipelines for data extraction and cleansing, utilizing Google Cloud's IAM for secure role-based access and Firestore for persistent, protected data storage. Acted as a trusted team player, hardening the agentic environment with Human-in-the-Loop (HITL) approval gates and strict sub-agent whitelisting to ensure solution integrity and security.

December 2024 – January 2026

Front-End Developer | National Alliance on Mental Illness (NAMI)

Architected and deployed a centralized design component library, enforcing architectural standards and streamlining UI deployment for the core business application.

Championed modern software development practices by building automated E2E testing pipelines with Cypress, reducing manual QA cycles and enabling continuous, confident delivery.

Collaborated with global cross-functional teams on code quality and accessibility initiatives that increased the aggregate compliance score by 30%, demonstrating commitment to responsible and robust engineering.

Software Engineer | Charity Navigator

August 2023 – September 2024

Engineered and optimized features for a high-traffic client portal, scaling the front-end architecture to successfully support over 700,000 concurrent visitors during peak events.

Partnered with product and data teams in a distributed environment to translate business requirements into technical solutions, transitioning legacy systems to optimized GraphQL API endpoints. Managed competing stakeholder expectations by framing project scope around modular, reusable components to enable rapid iteration while delivering an empowering end-user product.

Founder, Consultant & Web Developer | Volant Web Design

September 2024 – Present

Consulted directly with B2B clients to translate business requirements into full-stack software solutions, managing the entire product lifecycle from discovery and design to production deployment.

Front-End Web Developer | Charity Navigator

March 2019 – August 2023

Acted as a key technical contributor in a major platform modernization, collaborating with external agencies and internal stakeholders to build a production system serving 11M+ annual users. Executed full-stack technology initiatives that directly contributed to securing a \$5M grant and boosted data processing efficiency by 43%.

Founder & Web Developer | Volant Web Design

April 2017 – March 2019

Delivered end-to-end full-stack software solutions for diverse B2B clients, managing requirements gathering, development, deployment, and SEO optimization.

EDUCATION

Front-End Nanodegree — Udacity

Awarded full scholarship from Google's Grow with Google program

Master of Arts (MA), Counseling — Seattle University

Bachelor of Arts (BA), Anthropology — Dartmouth College

SKILLS

- **GCP & Agentic AI:** Vertex AI, Gemini, Multi-Agent Orchestration, LLM Inference, Firestore, IAM
- **Data & Backend:** Python, ETL Data Pipelines, GraphQL, REST APIs, PostgreSQL, SQLite
- **Full-Stack & DevOps:** React, TypeScript, JavaScript, Docker, CI/CD, Cypress, Playwright, Jest, Git
- **Consulting & Agile:** Client-Facing Engagements, Stakeholder Management, Product-Led Engineering, Outcome-Driven Design
