

Tyler Stahl

Front-End Engineer

Glen Rock, NJ · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

SUMMARY

Front-end software engineer focused on accessible UI implementation, practical testing, and maintainable web applications across React, TypeScript, and Laravel/Livewire stacks.

EXPERIENCE

Applied AI Developer — Independent R&D

2026-02 – Present · NJ

Builds applied AI infrastructure spanning multi-agent orchestration, hybrid LLM inference, structured extraction pipelines, and human-in-the-loop controls—including the InSummery.AI family schedule concierge capstone.

- Shipped a React schedule matrix and alerts sidebar highlighting gaps in high-contrast light/dark themes.
- Built an accessible React dashboard with onboarding, ingest panel, schedule matrix, alerts sidebar, and light/dark themes.

Technologies: Python, Google ADK 2.0, OpenClaw, Google Gemini, Gemma, Firebase, SQLite, Cursor Agent SDK

Front-End Developer — NAMI

2024-12 – 2026-01 · Remote

Built and maintained NAMI's Laravel-based core business application with a focus on reusable UI components, accessibility, and Cypress E2E testing.

- Introduced reusable design-system components to standardize front-end delivery across NAMI's Laravel application.
- Built Cypress coverage for key user flows in a Laravel/Livewire application, helping stabilize releases and improve UI regression testing.
- Ran accessibility audits and quality improvements that raised aggregate compliance score by 30%.
- Improved front-end registration behavior for multi-date training workflows in a Laravel/Livewire application.

Technologies: Laravel, Livewire, Alpine, Cypress, JavaScript

Software Engineer — Charity Navigator

2023-08 – 2024-09 · NJ

Contributed to a high-traffic React/TypeScript data portal, GraphQL API transitions, and cross-functional delivery with product and data teams.

- Optimized front-end architecture for a React/TypeScript portal serving tens of thousands of clients under high-traffic load.
- Integrated GraphQL endpoints into React/TypeScript portal workflows during API modernization.

Technologies: React, TypeScript, GraphQL, JavaScript

Front-End Web Developer — Charity Navigator

2019-03 – 2023-08 · NJ

Led frontend design and development for platform rebranding, technology migration, and high-traffic public web experiences.

- Translated agency designs into production frontend for a high-traffic nonprofit platform rebuild.
- Collaborated with marketing leadership to ship schedule-driven website features alongside major rebrand initiatives.

Technologies: JavaScript, HTML5, CSS, React

SELECTED PROJECTS

InSummery.AI — Independent R&D

2026

Family scheduling information lives in messy emails, texts, and PDFs; calendar apps assume tidy manual entry and do not detect multi-child childcare gaps or real-time disruptions with a human still in control.

Built a Google ADK 2.0 multi-agent concierge that masks PII, triages and extracts schedule data, pauses below 80% confidence for HITL clarification, maintains a multi-child schedule matrix with absolute/relative gap analysis, and syncs disruptions to Google Calendar—shipped as a Kaggle + Google 5-Day AI Agents Intensive Consult-track capstone.

Technologies: Google ADK 2.0, Python, Pydantic, Google Gemini, Vertex AI, Gemma, Ollama, Firebase, Firebase Cloud Functions, Cloud Firestore, Firebase Authentication, React, Vite, Google Calendar API, OpenTelemetry

NAMI Design Component Library — NAMI

2024-2026

Front-end delivery needed stronger architecture standards and reusable UI patterns across the core business application.

Built and implemented a centralized design component library to enforce standards and streamline UI deployment.

Technologies: Laravel, Livewire, JavaScript

NAMI 720 Event Platform — NAMI

2024-2026

Maintain and improve event-management workflows for nonprofit users and staff.

Contributed front-end implementation and Cypress testing practices in a Laravel/Livewire application.

Technologies: Laravel, Livewire, Alpine, Cypress

CCIE-TM Training Registration — NAMI

2024-2026

Support reliable registration behavior for multi-date nonprofit training workflows.

Improved registration handling, documented testing steps, and supported staging validation.

Technologies: Laravel, Livewire, Alpine, Cypress

Charity Navigator Data Review Portal — Charity Navigator

2023-2024

Internal and client data-review workflows needed a scalable React/TypeScript portal with modern API integration.

Engineered portal features and helped transition legacy data flows into GraphQL endpoints while collaborating with product and data teams.

Technologies: React, TypeScript, GraphQL

Charity Navigator Platform Rebuild — Charity Navigator

2019-2023

Modernize and rebrand a high-traffic nonprofit platform serving millions of annual users.

Led frontend execution of the 20th-anniversary rebrand and platform rebuild in collaboration with external design agencies and internal stakeholders.

Technologies: JavaScript, HTML5, CSS, React

SKILLS

Front-End: JavaScript, React, TypeScript, Alpine

Back-End: GraphQL

Testing: Cypress

Collaboration: Stakeholder collaboration
