SUMMARY

Front-end software engineer with experience building and maintaining user-facing web applications in nonprofit and mission-driven technology settings. Skilled in Laravel, Livewire, Alpine.js, Cypress, and UI implementation with a focus on reliability, testing, and practical delivery.

EXPERIENCE

Front-End Software Engineer — NAMI

2024 – Present · Remote

Front-end engineering on nonprofit event and training management platforms, with emphasis on Laravel/Livewire UI implementation, Cypress testing, and release reliability.

- Led Cypress automated testing implementation for a Laravel/Livewire event platform, improving regression coverage and team confidence.
- Delivered CCIE-TM training registration improvements including multi-date handling fixes, testing documentation, and release support from prime to staging.
- Maintains and implements UI features for nonprofit event and training management platforms built with Laravel and Livewire.

Technologies: Laravel, Livewire, Alpine.js, JavaScript, Cypress, HTML, CSS
